

THE CASE IH® QUADTRAC® RUNS ON TRACKMAN®

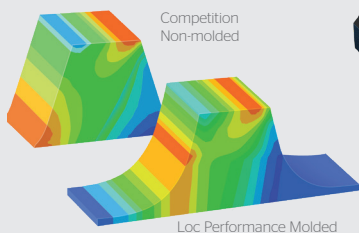

Our partnership with Case runs deep because together we bring new innovations and set new standards. We continue to deliver groundbreaking innovations in every track we make.

DESIGNED TO BE STRONGER, LAST LONGER AND RIDE SMOOTHER

FULLY-MOLDED IS STRONGER

- Fully-molded track equals tougher, longer-lasting track
- Non fully-molded has built-in weak points that can lead to early deterioration and failure

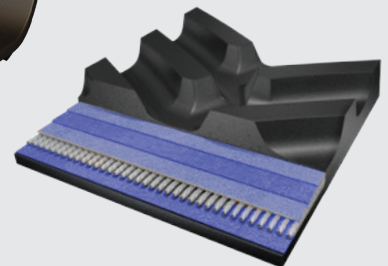

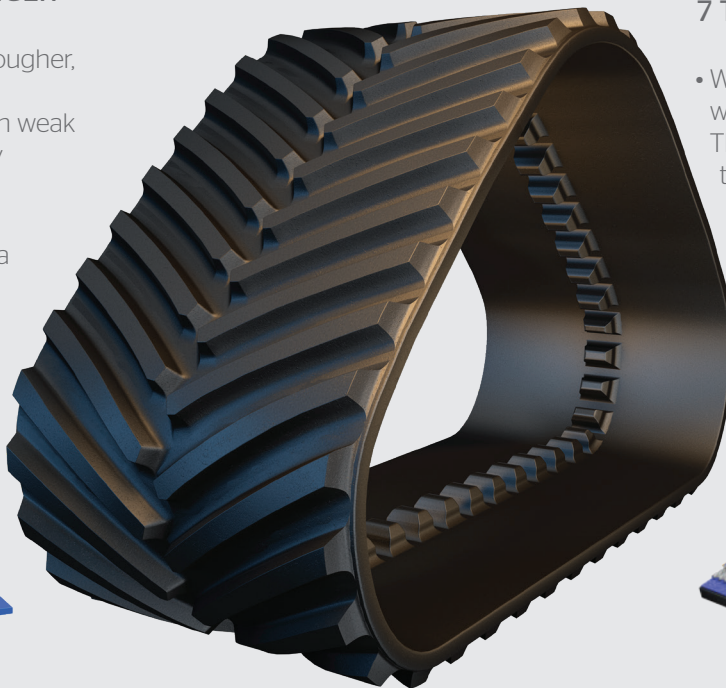

On top of longer life, you get a more consistent rubber thickness which leads to greater stability and smoother ride.

7 TIMES LONGER LIFE

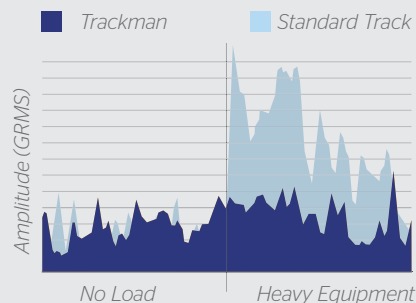

- Wire-ply construction with 50% more wires per inch than our competition. That's 12 wires per inch compared to only eight.
- Patented galvanized steel cables prevent corrosion and premature weakness.

All this adds up to a track that will last season after season, even under the heaviest load.

UP TO 70% REDUCTION IN VIBRATION

Exclusive Anti-Vibration Technology™ and advanced tread design on our track greatly reduces vibration by as much as 50% to 70% vs. standard track.

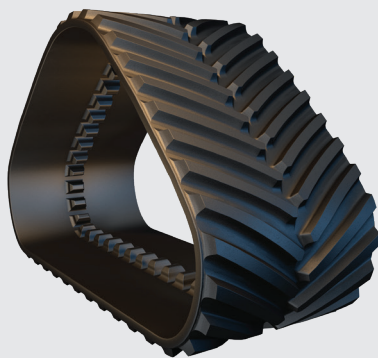

Dramatically improves operator comfort especially in heavy-pull operations.

Our tread design also maximizes traction and dirt cleanout for improved performance

Trackman by 

OUTWORKS. OUTLASTS. OUTPERFORMS. OUT HERE.

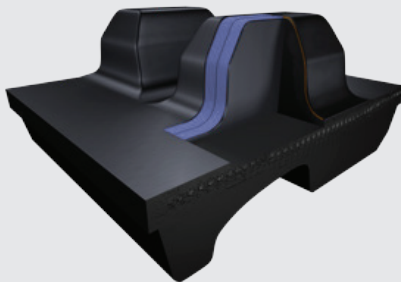

Trackman | T600 XP

STANDARD ON QUADTRAC MODELS
555 HP AND BELOW

Trackman has been designed to handle more horsepower and deliver better traction to pull more weight.

Our track delivers:

- Improved track life that outlasts standard track
- Reduced vibration for improved ride and operator comfort
- New wheel path compound is formulated to minimize abrasion and punctures

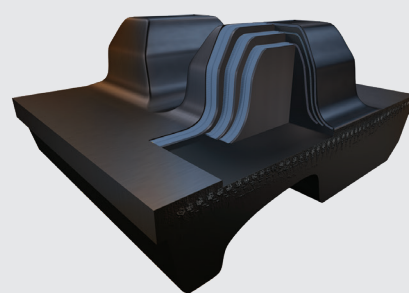

Trackman | T700 ARMOR*

EXCELLENT FOR ALL QUADTRAC MODELS

It has been thoroughly field-tested to deliver proven performance in the toughest conditions and outperform any other track of its kind.

- Exclusive ARMORLUG® technology extends the life of the track up to 23% more over the competitor's track
- Reinforcement fabric covers the entire drive lug and extends into the wheel path for added drive lug protection
- 4-year best-in-class limited manufacturer warranty

Trackman | T800 ULTRA*

HAULS THE HEAVIEST LOADS AT MAX HORSEPOWER AND TORQUE.

It can handle today's biggest, most power tractors and is designed to take on more, thanks to its patented drive lug with three fabric layers embedded in the lugs.

- First patented drive lug with three fabric layers (six plies) embedded in the lugs
- Top layer of fabric extends in the wheelpath for unmatched durability
- Offers up to a 25% increase in torque capability
- Lasts as much as 30% longer than any other positive-drive track
- 5-year best-in-class limited manufacturer warranty
